2019

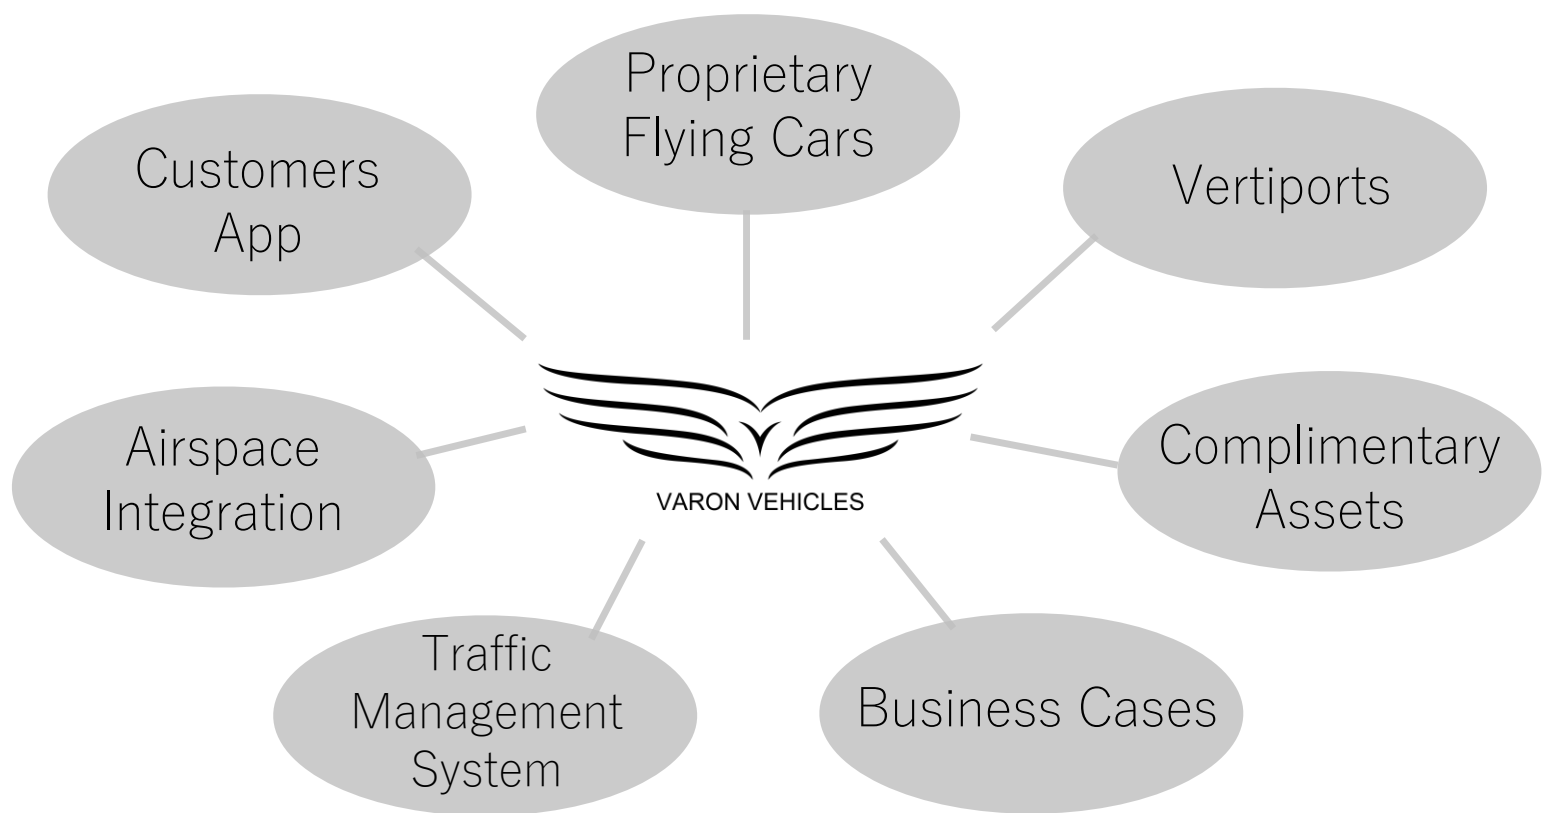

Urban Air Mobility Transportation Services

Urban mobility is mostly known for deteriorating people's quality of life and inefficiency. Valuable time is wasted in traffic, exposed to pollution, stress, defectuous infrastructure and urban insecurity.

Varon Vehicles is developing a new way of On Demand Transportation with Flying Cars, designed to be viable in cities and for people of Today:

Simple
City & User Friendly
Drivers, no pilots
Low Altitude Flight

Implementing a Test UAM Transportation System in a confidential Country

Capital Requirement in Seed Round: 9.3M

Engaged with:

Massachusetts Institute of Technology
